Professional Summary

Full-stack web developer specialized in Laravel, React, and MySQL, building modern business web apps from database to UI. I focus on clean code, scalable architecture, and great UX, with strong experience in admin dashboards using Filament and role-based access control. Looking for a junior/entry role where I can deliver real features fast and keep improving with a strong team.

Skills

- **Languages:** PHP, JavaScript, Python, Java
- **Backend :** Laravel, Livewire, REST API, Filament
- **Frontend :** React.js, TypeScript, Tailwind CSS
- **Databases :** MySQL, Redis
- **Devops & Tools :** Docker, Git, GitHub, Postman, Trello

Experience

Web Developer Intern — Province of Taroudant

May 2025 - Jun 2025

Laravel, React.js, MySQL.

- Designed and developed a digital mail management system (incoming/outgoing) to replace manual tracking.
- Implemented authentication and user management, with a responsive UI for internal staff.
- Collaborated with the IT team on technical support (PCs, printers, software installation, basic network configuration).

Projects

Multivendor E-commerce Store

Aug 2025 - Sep 2025

Laravel, PHP, MySQL, React, Inertia.js, Filament, Shadcn UI, Tailwind CSS, Stripe, Gemini API.

- Built a multivendor marketplace with vendor onboarding, product management, and storefront browsing.
- Implemented product variations & options (sizes, colors, etc.) with clean data modeling and UI.
- Integrated Stripe payments for secure checkout and order flow.
- Added Gemini API tools to help vendors generate product titles/descriptions faster and consistently.

Advanced Stock Management System

Sep 2025 - Oct 2025

Laravel, PHP, MySQL, Filament, Excel/PDF Reporting, Role-Based Access Control.

- Developed a complete inventory system: products, categories, suppliers, customers, purchases, and sales.
- Implemented stock in/out operations with real-time quantity tracking to reduce errors in inventory.
- Built reports (Excel/PDF) for purchases, sales, and stock status to support business decisions.
- Added RBAC (roles & permissions) + user management for secure multi-user usage.

HR Management System

Dec 2025 - Jan 2026

Laravel, PHP, MySQL, Filament, Filament Shield, Multilingual Support.

- Built an HR platform to manage employees, departments, and HR records in a structured admin panel.
- Implemented advanced roles & permissions using Filament Shield for secure access control.
- Added multi-language support with a smooth language switcher for a better user experience.
- Designed the system to be scalable and suitable for real administrative environments.
